

GAS & AIR LEAK DETECTOR

EFFICIENT • DEPENDABLE • ECONOMICAL • CONVENIENT

Use this low temperature Leak Detector on Gas and Air Line Connections, Tanks, Tank & Cylinder Valves, Cylinders, Condensers or any system that can be leak tested with air or gas. Designed for use above and below freezing.

SIMPLE TO USE!
Apply and bubbles will appear
where leaks present.

**WORKS IN
3 TO 5 SECONDS**

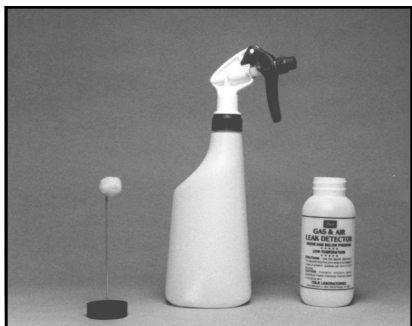

**EXCEPTIONAL SEEPING
QUALITIES!**
Locates the very small leaks
quickly and accurately.

Find large and small leaks quickly with this safe to use liquid. Not a soap! But a scientifically blended product that has the ability to find even the smallest hairline leaks and indicate them with a cluster of bubbles. Simply spray on, brush on, squirt on or swab on and, presto, large leaks - large bubbles, small leaks - small bubbles. No harsh chemical - safe to use - contains no ammonia's, acids, or any other harsh ingredients.
