

Lemon Disinfectant

Disinfectant – Cleaner – Sanitizer – Fungicide – Mildewstat – Virucide-
Deodorizer for Hospitals, Institutional & Industrial Use.
HIV, HEPATITIS B, HEPATITIS C Effective

Lemon Disinfectant is formulated for use in daily maintenance programs with a balance of detergents, biocides and malodor counteractants that deliver effective cleaning, disinfecting and odor control. It is an extremely effective one-step disinfectant-cleaner that is effective against a broad spectrum of bacteria, is virucidal (including HIV-1, HBV & HCV), fungicidal and will prevent the growth of mold and mildew and their odors. When used as directed, it will deodorize surfaces in restrooms, refuse areas and other places where bacterial growth can cause mal odors.

This product meets the current EPA organic soil contamination requirements which call for all efficacy testing to be carried out in the presence of 5% blood serum for one-step cleaner-disinfectants and non-food contact surface sanitizers. In addition, all efficacy testing was carried out in water of 400ppm hardness and is chemically balanced to provide clear solutions even in the presence of hard water.

This lemon scented disinfectant is a highly concentrated product designed to be diluted with water prior to use. For use as a hospital use disinfectant, virucide*, fungicide and for mold and mildew control use at a 1:64 (2 oz./gal) dilution rate to effectively control:

Bacteria: Pseudomonas aeruginosa, Staphylococcus aureus, Salmonella choleraesuis, Brevibacterium ammoniagenes, Enterobacter aerogenes, Enterobacter faecalis, Enterobacter faecalis-Vancomycin resistant (VRE), Escherichia coli, Klebsiella pneumoniae, Legionella pneumophila, Proteus mirabilis, Salmonella Schottmuelleri, Salmonella typhi, Serratia marcescens, Shigella dysenteriae, Staphylococcus aureus Methicillin-Resistant (MRSA), Staphylococcus aureus Vancomycin Resistant, Streptococcus faecalis, Streptococcus salivarius **Viruses:** Hepatitis B Virus, Hepatitis C Virus, Herpes Simplex Type 1, Herpes Simplex Type 2, HIV-1 (Aid virus), Human Coronavirus, Influenza Type A2/ Japan virus, Vaccinia Virus **Fungi:** Trichophyton mentagrophytes, Aspergillus niger

After proper dilution apply solution to surface to be cleaned and disinfected. Use on floors, walls, tables, chairs, countertops, sinks, shower stalls, bed-frames, garbage cans and other hard non-porous surfaces. Apply with cloth, mop or mechanical spray so as to thoroughly wet the surface. Allow solution to remain on surface for at least 10 minutes.

Prepare fresh solution daily or when solution becomes visibly dirty.
